INDIUM

AGENTIC AI SERVICES

# FROM AI PILOT TO P&L IMPACT.

An overview of Indium's agentic AI services: how our engineers take AI agents from proof of concept to governed, production-scale operations.

REIMAGINE · DESIGN · BUILD · DEPLOY · GOVERN · SCALE

WWW.INDIUM.TECH

THE CASE FOR ACTING NOW

# AGENTIC AI WORKS. MAKING IT PAY IS THE HARD PART.

Most enterprises have proven agentic AI in a pilot. Far fewer have taken it into production at scale. Indium closes that gap with forward-deployed engineers (FDEs) who work inside your teams, with governance built in and commercials tied to the outcomes you measure.

## WHAT STALLS SCALE, AND HOW WE UNBLOCK IT

| | | |
|---|---|---|
| 01 | **Architecture & data**<br>Legacy systems, fragmented data | Enterprise connectors, a unified AI knowledge layer, and The Lifter to modernize legacy code and data. |
| 02 | **Unproven ROI**<br>No clear case for the next dollar | ARC Rethink quantifies value before you invest; outcome-aligned commercials share the risk. |
| 03 | **Governance & risk**<br>Regulatory and operational exposure | Guardrails, audit trails, red-teaming and AI cost governance, designed in from day one. |
| 04 | **Workforce trust**<br>Unclear roles and decision rights | Human-in-the-loop design, workforce transition planning and AI literacy for your teams. |

HOW WE WORK

# ONE PARTNER, FROM STRATEGY TO PRODUCTION.

## 01 ENVISION

Find where agents pay off and build the business case.

Opportunity mapping · Payback modeling · Workforce plan

## 02 ENGINEER

Design and integrate agents that fit how your enterprise runs.

Multi-agent orchestration · Human-in-the-loop · Connectors

## 03 OPERATE

Keep agents reliable, observable and cost-efficient in production.

Observability · Drift detection · Cost optimization

## 04 GOVERN

Keep every agent trusted, explainable and compliant.

Guardrails · Audit trails · Red-teaming · AI literacy

ENGAGE AT YOUR STAGE OF MATURITY

**8–12 weeks**
START

### Use-Case Delivery

Validate, build and deploy one high-value use case, end to end.

**3–6 months**
STANDARDIZE

### Enterprise AI CoE

Stand up the strategy, governance and platforms that make delivery repeatable.

**6–12 months**
INDUSTRIALIZE

### Agentic AI Factory

Scale delivery across the enterprise with reusable blueprints and AgentOps.

PLATFORM-LED DISCOVERY

ARC rethink

# AI OPPORTUNITY DISCOVERY PLATFORM

## WHAT IT DOES

ARC Rethink identifies AI opportunities across business processes, reimagines workflows, validates recommendations with supporting evidence, and quantifies potential ROI before investment.

## HOW IT WORKS

**Three Intelligence Engines. One Knowledge Library. One End-to-End Journey.**

| | | |
|---|---|---|
| 01 | **Process Flow Ingestion** | Captures and visualizes existing business processes (AS-IS). |
| 02 | **AI Pattern Ingestion** | Evaluates relevant AI implementation patterns against existing business processes. |
| 03 | **Analysis Engine** | Identifies and scores AI opportunities through evidence-based recommendations. |

## CORE FUNCTIONALITIES

**Process Optimization**

Recommends workflow improvements before introducing AI.

**Business Value Quantification**

Compares AS-IS and TO-BE processes and calculates ROI, annual benefits, and payback periods.

## MEASURABLE IMPACT

- Enables quantified ROI assessment.
- Evidence-backed opportunity prioritization.
- End-to-end process visibility.
- A Repeatable Methodology: Consistent, Transparent, and Traceable.

## PRE-BUILT AGENTIC AI SOLUTIONS

**ALPHA**
Investment analyst assistant
**2–5x** faster investment insights

**PIVOT**
Proposal intelligence
**10x** faster RFP analysis

**INgage**
Sales assist
**10 min** account research, from 2 days

**Natural Language to Insights**
Conversational Analytics Assistant
**4x** lower analyst support costs

Also in the portfolio: Prior Authorization · Care Coordination · Supply Chain Control Tower

## BUILT IN-HOUSE

### The Lifter

A homegrown platform powered by our own agentic AI. It understands complex enterprise systems and automates legacy modernization, data, testing, and application management.

## CONTEXT LIVES IN PIECES

**Teams pay for it with technical debt and reverse engineering tax.**

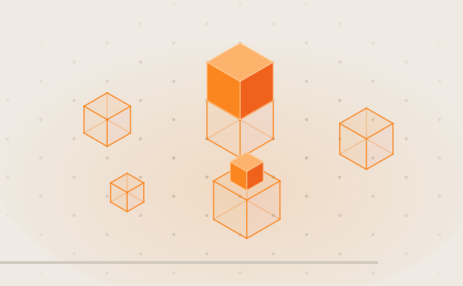

The Lifter brings that context back together, so teams move faster.

**Available on AWS Marketplace**

| Legacy Lifter | Data Lifter | Test Lifter | AMS Lifter |
|---|---|---|---|
| **15x** | **50%** | **75%** | **25–40%** |
| faster codebase analysis | more data, same team | less test design effort | better MTTR |

PROOF, NOT PROMISES

# WHAT OUR CLIENTS WALKED AWAY WITH.

ENGINEERING & CONSULTING

## Global engineering & consulting firm

Grew early pilots into an enterprise AI portfolio with built-in governance.

**74%** faster task completion

**11%** higher proposal win rate

**2x** AI adoption across the firm

LIFE SCIENCES

## Global non-profit leader in regenerative medicine

AI Labs-as-a-Service took donor and product agents into production.

**50%** less donor validation time

**30%** better product matching

**100%** customer calls answered

EPC & INFRASTRUCTURE

## Global EPC firm with 100+ years of history

An Agentic AI Factory unified siloed models into one governed engine.

**2 days** issue resolution, down from ~1 month

**56%** stronger cash-flow forecasting

**Zero** disruption during transition

NEXT STEP

# SEE MEASURABLE VALUE BEFORE YOU COMMIT AT SCALE.

**2–3 weeks**
**Guided discovery**
Use cases ranked by ROI

**3–4 weeks**
**Proof of Value**
A working prototype

**1–2 weeks**
**Scoped proposal**
Roadmap, team and SoW

**3–6 months**
**Scale**
AI CoE or AI Factory

INDIUM

# DRIVEN BY AI.
# POWERED BY INNOVATION.
# FOCUSED ON YOU.
